

Confirmation

Eurofins Product Testing A/S confirms that a sample of a Silicone Sealant with the name

OTTOSEAL S 34 supplied by Hermann Otto GmbH

showed low VOC contents in a test as specified in LEED credit EQ 4.1 (adhesives and sealants).

VOC contents were below the limit value specified as 420 grams VOC minus water per liters for Silicone Sealants (other sealants).

The test has been performed in October 2010, see test report no. G04827.

Volatiles content was calculated by Eurofins. Water content was specified by manufacturer. Solids content was determined by Eurofins.

With this confirmation, use of product OTTOSEAL S 34 may qualify for fulfilment of LEED credit EQ 4.1 (adhesives and sealants).

Test Report - LEED EQ 4.1 - 2009

Sample material

Cample material		
Sample identification	OTTO SEAL S 34	
Product type	Silicone Sealant	
Product data, according to manufacturer	Density: 1.16 g/ml at 20 °C	
Date received	1 October 2010	
Analytical period	October 2010	

Methods applied

Method	Principle	Parameter	Detection limit	Uncertainty
LEED EQ 4.1-2009	Gravimetrie	Valatile/Solid Content of Coatings	1 0/1	0.1 %
ASTM D 2369 - 04	Gravimetric	Volatile/Solid Content of Coatings	1 g/l	0.1 %

Volatile content of the sample was determined gravimetrically by heating up to 110 °C during 60 minutes. The result is the average of triple testing. The result was calculated as:

([g all volatiles] - [g water] - [g exempt compounds]) / ([l material] - [l water] - [l exempt compounds])

Analytical results

	Solid content, % mass	Water content, % mass	VOC less water less exempt com- pounds, g/l	VOC limit g/l
OTTO SEAL S 34	92.8 %	0 **	84	420 *

^{*} VOC limit for Silicone Sealants (other Sealants).
